Data Analysis

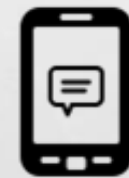

PROBLEM STATEMENT

- Non-availability of bills at single place
- Lack of E-Bills from offline stores
- Uneasy management of available E-Bills
- Difficult for stores to provide such service
- Challenging Finance Tracking and Management
- Wastage of paper
- Tax theft done by shopkeepers

CURRENT SOLUTIONS

- Migration to a new billing platform
- Management of separate POS system
- Email/SMS of bills, hence difficult to management for consumer

PROPOSED SOLUTION

- A mobile application to access original & authentic bills, from all stores (online/offline) at place.
- The storekeeper will only need to install an add-on in their current billing software. No need to shift to a new billing platform.
- Easy finance tracking and expenses management for consumers
- Stores will get a page where they can publicize themselves, show advertisements etc.
- This will help prevent the tax theft as all sales record will be visible to the government.

 **Add-Ons**

CONSUMER BENEFITS

- ✓ Availability of all original & authentic bills, from all stores at one place.
- ✓ Easy Expense management, finance tracking and searching of bills
- ✓ Accessible from anywhere and anytime.
- ✓ Search for stores to buy products and see the available offers from stores.
- ✓ Review the shop and products (they bought) after the purchase.
- ✓ Customers data analysis services

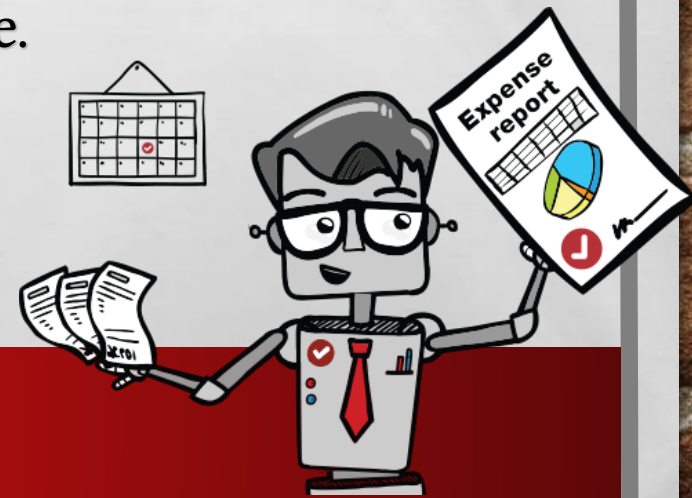

Any Time

Any Where

Any Device

VENDOR BENEFITS

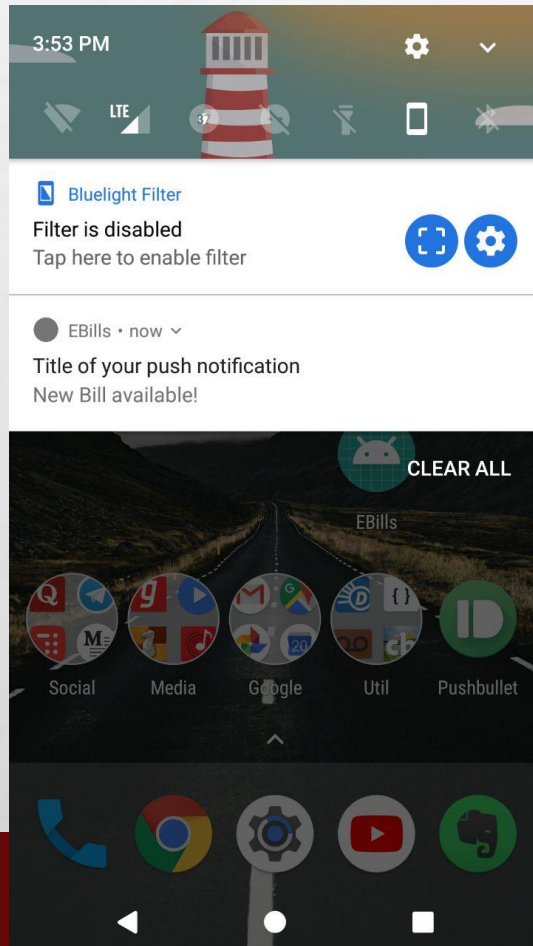

Add-Ons

- ✓ Just need to install an add-on in their current billing software.
- ✓ Data analysis service without much effort.
- ✓ Dynamic advertisement on bills.
- ✓ Can promote themselves with search prioritization feature.
- ✓ Platform to publicize themselves, show advertisements and offers, etc.
- ✓ Get product specific reviews.
